Hi Geoffrey,

Just checking if you have completed the review for NGS's permit. Attached is the newest version of the draft for NGS which incorporated the comments for NNEPA, the source, and your comments on Four Corners Power Plant's permit. If you haven't started reviewing it, please use the attached version instead. Thank you.

Subject: Draft Permit for NGS for Review

Hi Tennille,

Attached is the draft TV permit renewal package for NGS for your review. As you indicated earlier, NNEPA and US EPA will need 3 weeks to review the draft. Therefore, please provide your comments on the draft by 08/29/14 (Fri). Since we have a very tight schedule for these two permits, it will be very helpful if NNEPA or US EPA could finish the review earlier.

Please note that I didn't hear back from US EPA about my question regarding to the MATS extension approval. Therefore, I have to assume it is an extension for the entire MATS rule (not just for Hg emission standard) as stated in the approval letter. Since the source has not decided their control strategy and compliance plan, I do not include the detail MATS requirements in the draft permit. Only the emission limits and the implementation schedule. The source will have to apply for a permit modification later to include their specific MATS compliance requirements.

Please feel free to contact me for any questions about the draft. Thank you.

Yu-Lien
